# 企业简介 COMPANY PROFILE

企业地址位于浙江省杭州市临安区青山湖街道鹤亭街333号，厂房面积200000平方米，员工500余人，汇聚了行业精英技术团队，专业生产制造锁模力90T-6600T注塑机的大型设备企业。

公司为了朝健康永续的经营理念迈进，重点配置了技术、研发和生产品质骨干人员积极投入新产品序列的研制。以高质量服务于市场，满足行业客户需求，在传承台联塑知名品牌“TUP”的基础上，丰富了工厂产品线；先后推出了鸿正系列各种节能的UN系列射出成型机，包括双色射出成型机、三色射出成型机、混色射出成型机、电木射出成型机、硬质PVC粉料射出机等系列产品，并积极开发以物理发泡射出成型机和全电式射出成型机为后续发展主力。

在传承台湾联塑知名品牌T.U.P.的基础上，公司也一直秉承“科技为本、速度致胜”的企业精神，以及“质量、服务、创新”企业理念，传承发扬台湾联塑先进的机械制造技术，不断推进管理革新提升核心竞争力，在致力于为客户创造无穷的财富与未来的同时，全力打造绿色环保智能设备的现代化企业！

The company is located at Qingshanhu Residential District Heting Street No.333, Lin'an Hangzhou, Zhejiang China. Province. It covers an area of 200,000 m<sup>2</sup> and employs more than 500 people. Is specializing in the production of clamping force 90T-6600T injection molding machine large equipment enterprises.

In order to move towards a healthy and sustainable business philosophy, the company focuses on the deployment of technology, reSearch and development and production quality backbone personnel actively involved in the development of new product series. To serve the market with high quality, to meet the needs of customers in the industry, on the basis of inheriting the well-known brand "TUP", enriched the factory product line; Bakelite injection molding machine, rigid PVC powder injection machine and other products, and actively develop the physical foam injection molding machine and all-electric injection molding machine as the main follow-up development.

On the basis of inheriting Taiwan Liansu well-known brand T.U.P., the company has been adhering to the "technology-based, speed to win" spirit of enterprise, as well as "quality, service, innovation" business philosophy, inheritance and development of Taiwan Liansu advanced machinery manufacturing technology to promote management innovation to enhance core competitiveness, In the commitment to create infinite wealth and future for customers at the same time, to create a green intelligent equipment of modern enterprises!

# UN-PET 系列 瓶胚专用注塑机

UN-PET PREFORM INJECTION MOLDING MACHINE

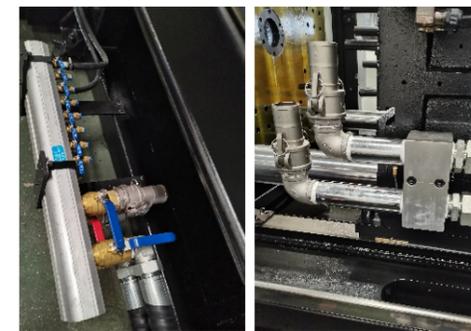

目前，PET被广泛应用于饮料、纯净水、糖果、饼干、食用油、化妆品、医药品和清洁用品的容器包装方面，随着瓶装饮品的风行，二步法成型工艺在大容量管坯成型中优势尽显。

UN-PET系列瓶胚专用注塑机结合了国内外先进技术，具有节能环保、稳定可靠、高效精密等优点。机器规格齐全，适应多种不同瓶坯的选择，极高的性价比，能为客户创造更佳的投资回报和使用体验。

At present, PET is widely used in container packaging of beverages, purified water, candy, biscuits, edible oils, cosmetics, pharmaceuticals and cleaning products. With the popularity of bottled drinks, the two-step molding process shows advantage in the production of large-capacity preform molding.

UN-PET series preform injection molding machine combines advanced technology at home and abroad, and has the advantages of energy saving, environmental protection, stability, reliability and high precision. The machine has complete specifications and is suitable for a variety of different preforms; it is extremely cost-effective and can create a better return on investment and a better experience for customers!

大流量的冷却水路。  
Large flow cooling water channel.

伺服控制系统比常规机器节电30%~50%。  
The servo motor control system can save energy by 30%~50%.

高效混炼PET专用螺杆标配红外发热圈，显著提高熔胶速度和注射量，降低塑化温度与AA值，有效改善制品的收缩问题，提高透明度。

The special screw for high-efficiency PET mixing is equipped with an infrared heating ring as standard, which is remarkable. Increase the melting speed and injection volume, and reduce the plasticizing temperature and AA value. Effectively improve the shrinkage of products and improve transparency.

加大顶出力和顶出行程，适应瓶坯的顶出要求。  
Increasing ejector force and ejector stroke, adapts with PET preform drawing.

变量泵控制系统比常规机器节电20%~30%。  
The variable pump control system can save energy by 20%~30%.

## 特点 Pecularity

1. 螺杆长径比大，标配加强混炼段，能保证混色均匀，熔胶背压更少，并可支持更高的熔胶转速；
2. 塑化组件采用进口钢材，通过特定的热处理工艺，避免制品出现银丝、发白、黑点、AA值偏高等不良现象，使塑化质量有明显的提高；
3. 加大熔胶马达，熔胶实际压力低，负荷轻，熔胶密度稳定，背压容易调整；
4. 冷却系统加大，冷却效果更高效；
5. 全系列机型加大顶出力
6. 动力配置在普遍行业专用机的基础上加大一级，排量输出提高。

1. The ratio of length to diameter of the threaded rod is large, and the mixing section is strengthened as the standard configuration, which can ensure homogeneous color mixture, less back pressure of sol and support higher rotate speed of sol;
2. The imported steels are used for the plasticizing components, and the bad phenomena of filamentary silver, whitening, dark spots and high AA value are avoided through the specific heat treatment process, so that the plasticizing quality can be obviously improved;
3. Enlarge melt motor, the actual pressure of melt is low, the load is light, the melt density is stable, and the back pressure is easy to adjust;
4. The cooling system is enlarged, and the cooling effect is more efficient;
5. The whole series of machine types increase the ejecting force
6. The power allocation is increased by one level based on the special machines in the general industry, and the displacement output is improved.

# UN-PET 系列 小高速瓶胚专用注塑机

UN-PET HIGH SPEED PREFORM INJECTION MOLDING MACHINE

### PET瓶胚生产实例

注塑机型号: UN-PET  
针阀热流道模具腔数: 48  
单个产品重量: 13g  
材料: PET  
周期: 14s  
日产量: 30万个, 3.85T原料

### PET Preform Production Instance

Machine Model: KPET3105L-E6  
Hot Runner Mold Cavity: 48  
Weight: 13g  
Material: PET  
Production Cycle Time: 14s  
Daily Output: 300000PCS, 3.85T Material

✦ 表示该功能为选配,且适用于所有PET机型  
Indicates that this function is optional and is applicable to all PET models

PET系列快速瓶胚专用注塑机,是在PET系列成功机型平台上开发的专用机型,是以市场为导向、传承之技术优势、并进行产品创新与迭代的成果。机型在重复精度、塑化速度、功率消耗等多项技术参数方面均处于行业领先水平PET系列高速、节能、稳定的出色表现,是PET注坯成型市场领域的正确选择,能为用户的业务创造了良好的前景

UN-PET series high speed preform injection molding machine is a special model developed on the successful series of PET. It is market-oriented, inherits the technical advantages, and carries out product innovation and iteration. The PET series are in the leading position in the industry in terms of repeatability, plasticizing speed, power consumption and many other technical parameters. The high performance, energy saving and stable performance of PET series is the correct solution in the PET injection molding market, which can create a good prospect for the user's business.

电动熔胶,传动效率高,能效比提升,节能效果明显

series electric charging high transmission efficiency, improved energy efficiency ratio, and obvious energy saving effect.

✦ 三工位水冷取坯机械手(选配),节省了在模内冷却的时间,从而降低了生产的时间周期

Three stations water cooling robot saves the cooling time in mold which reduces the cycle time (optional)

锁模部份全封闭钣金结构(选配),符合卫生和温控要求,模具保护。

Whole closed safe door meets the requirement of sanitary and thermo-control (optional) Mold protection.

✦ 同步保压功能(选配),产能可进一步提升10%~15%

Pressure holding and charge at the same time, which can increase the output by 10%~15% (optional).

高效混炼PET专用螺杆,标配红外发热圈,显著提高熔胶速度和注射量,降低塑化温度与AA值,有效改善制品的收缩问题,提高透明度。

Special screw for high-efficiency PET mixing, standard infrared heating ring. Significantly increase the melting speed and injection volume, and reduce the plasticizing temperature degree and AA value, effectively improve the shrinkage problem of products, increase transparency.

\*本公司根据产品提升的需要，可对技术参数、部份元件配置及服务内容进行更改，恕不另行通知。  
\*According to upgrading of machine, we will change technical parameters, configuration of some parts and service's items without further notice

### 特点 Pecularity

1. 螺杆长径比大，标配加强混炼段，能保证混色均匀，熔胶背压更少，并可支持更高的熔胶转速；
2. 塑化组件采用进口钢材，通过特定的热处理工艺，避免制品出现银丝、发白、黑点、AA值偏高等不良现象，使塑化质量有明显的提高；
3. 加大熔胶马达，熔胶实际压力低，负荷轻，熔胶密度稳定，背压容易调整；
4. 冷却系统加大，冷却效果更高效；
5. 全系列机型加大顶出力
6. 动力配置在普遍行业专用机的基础上加大一级，排量输出提高。
7. 同步顶针功能，降低生产的时间周期（选配）。

1. The ratio of length to diameter of the threaded rod is large, and the mixing section is strengthened as the standard configuration, which can ensure homogeneous color mixture, less back pressure of sol and support higher rotate speed of sol;
2. The imported steels are used for the plasticizing components, and the bad phenomena of filamentary silver, whitening, dark spots and high AA value are avoided through the specific heat treatment process, so that the plasticizing quality can be obviously improved;
3. Enlarge melt motor, the actual pressure of melt is low, the load is light, the melt density is stable, and the back pressure is easy to adjust;
4. The cooling system is enlarged, and the cooling effect is more efficient;
5. The whole series of machine types increase the ejecting force
6. The power allocation is increased by one level based on the special machines in the general industry, and the displacement output is improved.
7. Synchronous ejector function reduces production time cycles (optional).
